

## Appendix D

# Potential Candidates for HICS Command and General Staff Positions

*Purpose:* The “Potential Candidates for HICS Command and General Staff Positions” provides suggestions for administrative positions commonly found in hospitals and their potential assigned roles in the Hospital Command Center (HCC), when activated. These suggestions are based on similarity of day-to-day position roles and those operational response roles assigned during the activation of the HCC.

*Use:* The crosswalk is intended for pre-incident planning and assignment of Hospital Incident Management Team (HIMT) Command and General Staff roles. By pre-assigning HIMT assignments, personnel can be educated and exercised on their duties and scope of responsibility during an activation, and will be familiar with the associated Job Action Sheet (JAS) before the event. It is recommended that each HIMT Command position have not less than three to seven persons pre-assigned to each role to allow for extended operations.

## APPENDIX D – CANDIDATES FOR HICS COMMAND AND GENERAL STAFF POSITIONS
